OK Elections Interactive Statistics (EIS) Guide

This guide is an instructional aid to the use and understanding of the OK Elections Interactive Statistics (EIS) web application. EIS is intended to provide the citizens of the State of Oklahoma a look into the current state of Oklahoma elections as well as an historical look back. Historical data becomes available for different features at different times. That is due to how various features were implemented on varying schedules over the years.

EIS provides only summarized, statistical data. It does not contain any data that is uniquely identifiable down the level of individual voters. Statistical data is broadly assembled into the following categories:

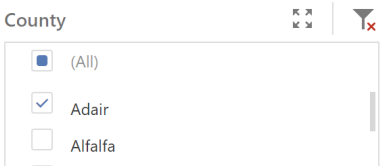

- **Voter Registration Statistics**
- **Absentee Statistics**
- **Voter History Statistics**
- **District Precinct Lookup**

Each category and its dashboards are described in more detail below. Refer to the end of the document for a definition of terms.

Common Features

Almost all statistics pages are broken down into two main areas on the page:

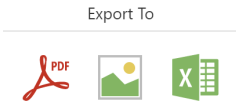

- **Filters Section**
  The filters section, when available, is comprised of a group of controls on the left side of the page. Filters are a method of narrowing down the data you are looking for. Filters can be a drop-down, a selection list, or a data-range slider. Each filter, when activated, will display an indicator at the top of the filter to indicate it is currently active. For example:

  In this filter for County, Adair County has been chosen. You can tell that the county is chosen by the corresponding checkbox on the county name, and by the filter indicator at the top of the filter. To turn off, or deactivate the filter, simply click on the filter indicator with the red x.
- **Statistics Information Section**
  The statistics information section is usually found in the center of the page, to the right of the filters section, when present. The statistics information section is comprised of one or more panels with information usually in a graphic or detail form. When looking at a panel it is possible to expand the panel to full-screen by pressing on the maximize button for the panel . Once a panel is maximized you can return it to its normal state by pressing on the panel restore button .

  Some information panels will allow you to export the data in the panel. To export the data,

press the export button on the panel . You will then be allowed to choose the format of your export. Please see the example below:

You can choose PDF, Image, or XLS file exports. Each type of export has an options panel allowing customization of the export. This, for example, is the options panel for XLS exports:

In most cases we recommend that you check the boxes to include both Filters and Parameters for your exports to be included on a separate page/tab in your results. This is so that you can always refer back to the choices that produced your output.

Voter Registration Statistics

Dashboards referring to "Voter Registration Totals" are counts of the registration numbers as of the end of a month, referred to as *Statistics Date*. Other dashboards named with "Transactions" or "Cancellations" are a count of transactions (i.e., new registrations, address changes, cancellations, etc.) which are reported for the entire month associated with the *Statistics Date*. For instance, "address changes" reported for the Statistics date of 9/30/2022 represent all the address changes during September of 2022.

Voter Registration Totals

The Voter Registration Totals dashboard provides voter registration counts as of the Statistic Date. Statistic Date defaults to the most recent month-end, but users may select dates going back several years. Results can be filtered by political affiliation, as well as county and precinct. The primary grid view displays registration totals for each affiliation by county. Each county can be expanded to display registrations by precinct.

Voter Registration Totals by Status

The Voter Registration Totals by Status dashboard provides voter registration counts as of the Statistic Date. Statistic Date defaults to the most recent month-end, but users may select dates going back several years. Results can be filtered by political affiliation as well as county and precinct. The primary grid view displays registration totals split by active and inactive voters for each affiliation by county. Each county can be expanded to display registrations by precinct.

OK Elections Interactive Statistics (EIS) Guide

Voter Registration Totals by Date

The Voter Registration Totals by Date dashboard provides voter registration totals across several Statistic Dates. Totals for a given date are "as of" the date listed. The slider at the bottom of the page allows the user to select the range of dates they are interested in. Results can be filtered by political affiliation as well as county and precinct. The primary grid view displays registration totals for each affiliation by month-end date. Each county can be expanded to display registrations by precinct.

Voter Registration Transactions by Date

The Voter Registration Transactions by Date dashboard provides the number of voter registration transactions that occurred during a period of time. The Statistic Date shown represents the entire month, i.e., 9/30/2022 will include all of the transactions that occurred in September of 2022. Results can be filtered by political affiliation and county. The slider at the bottom of the page allows the user to select the range of dates they are interested in. The primary grid view displays registration transaction totals for each of the supported categories for the entire month ending with the Statistic Date.

Voter Registration Transactions by County

The Voter Registration Transactions by County dashboard provides the number of voter registration transactions that occurred during a selected period of time, broken down by county. The information displayed is a summary across all of the selected months in the range. The slider at the bottom of the page allows the user to select the range of dates they are interested in. **The Statistic Date range slider only works when selecting the last day of the month desired**. Even if the slider shows a date in the middle of the month, that month's data is only included if the last day of the month is selected. Results can be filtered by political affiliation, source and county. (See "definition of terms" for more information.) The primary grid view displays registration transaction totals for each of the supported categories (new registrations, name changes, address changes, etc.) for the selected county or counties.

Voter Registration Cancellations by Date

The Voter Registration Cancellations by Date dashboard provides the number of voter registrations that were cancelled during a period of time. The Statistic Date shown represents the entire month, i.e., 9/30/2022 will include all of the transactions that occurred in September of 2022. Results can be filtered by political affiliation and county. The slider at the bottom of the page allows the user to select the range of dates they are interested in. The primary grid view displays cancellations for each of the supported categories for the entire month ending with the Statistic Date.

Voter Registration Totals by District

The Voter Registration Totals by District dashboard provides voter registration counts as of the Statistic Date. Statistic Date defaults to the most recent month-end, but users may select dates going back several years. This dashboard allows specific filtering by either Congressional District, State Senate District or State House district. Results can also be filtered by political affiliation, as well as county and precinct. The primary grid view displays registration totals for each affiliation by county. Each county can be expanded to display registrations by precinct.

OK Elections Interactive Statistics (EIS) Guide

Voter Registration Totals by Voter District/Status

The Voter Registration Totals by Voter District/Status (active, inactive) dashboard provides voter registration counts as of the Statistic Date. Statistic Date defaults to the most recent month-end, but users may select dates going back several years. This dashboard allows specific filtering by either Congressional District, State Senate District or State House district. Results can also be filtered by political affiliation, as well as county and precinct. The primary grid view displays registration totals split by active and inactive voters for each affiliation by county. Each county can be expanded to display registrations by precinct.

Absentee Statistics

Absentee Statistics encompass all voters who have applied for absentee ballots, including those who are confined to a nursing home or veterans' center and have absentee ballots delivered to their residence by their county's Absentee Voting Board. While absentee statistical data is tied to a specific election date, the report is fluid. Absentee ballot activity such as the processing of new applications, changes to applications, and the return of absentee ballots begins well before the date of the election, and therefore, will continue to be updated in the weeks leading up to and after the election date. (For some large counties, the recording of the disposition of absentee ballots can take several weeks.) It is important to note that the absentee statistics report "freezes" several weeks following the election, creating a static report.

Absentee Statistics by Date

The Absentee Statistics by Date dashboard provides counts of absentee ballots related to the ballot process for each specified election date. The election dates displayed are controlled by the slider tool at the bottom of the page. Results can be filtered by political affiliation, ballot type, application source and county. (See "definition of terms" for more information.) The primary grid view displays ballots sent, received and rejected. Rejections are not recorded in the system until after the election, so there will be no statistics for rejections until at least the day following the election.

Absentee Statistics by County

The Absentee Statistics by County dashboard provides counts of absentee ballots and data related to a specified election date, by county. Election Date defaults to the most recent, but users may choose from earlier dates as well. Results can be filtered by political affiliation, ballot type, application source and county. (See "definition of terms" for more information.) The primary grid view displays ballots sent, received and rejected by county. Rejections are not recorded in the system until after the election, so there will be no statistics for rejections until at least the day following the election.

Absentee Statistics by Type

The Absentee Statistics by Type dashboard provides counts of absentee ballots related to the ballot process, by type of application, for each specified date. Election Date defaults to the most recent, but users may choose from earlier dates as well. Results can also be filtered by political affiliation, ballot type, application source and county. (See "definition of terms" for more information.) The primary grid view displays ballots sent, received and rejected by application

type. Rejections are not recorded in the system until after the election, so there will be no statistics for rejections until at least the day following the election.

Voter History Statistics

Voter history or voter history credit is the record of a voter's participation in an election. It is recorded for the election date, even if the voter cast their ballot ahead of time via absentee or early voting. Voter history viewed by affiliation, county or precinct uses the voter's assignment thereof at the time the history was recorded.

Voter History Credit by County

The Voter History Credit by County dashboard provides counts of voting participation in an election by county for an election date. Election Date defaults to the most recent, but users may choose from earlier dates as well. Results can also be filtered by political affiliation, voting method, as well as county and precinct. The primary grid view displays voter history by affiliation and by county. Each county can be expanded to display history credit by precinct.

Voter History Credit by District

The Voter History Credit by District dashboard provides counts of voting participation in an election by county for an election date. Election Date defaults to the most recent, but users may choose from earlier dates as well. This dashboard allows specific filtering by either Congressional District, State Senate District or State House district. Results can also be filtered by political affiliation, voting method, as well as county and precinct. The primary grid view displays voter history by affiliation and by county. Each county can be expanded to display history credit by precinct.

District Precinct Lookup

The District Precinct Lookup dashboard allows users to see the precincts assigned to voting districts in Oklahoma. Select the desired District Type and District Description to see the list of precincts. For districts in more than one county, the County filter will allow you to customize which county or counties are included.

Definition of Terms

- **Active Voters** – "Active" voters are registered voters who have 1) never received an Address Confirmation Notice, or 2) have updated their address or registration upon receipt of an Address Confirmation Notice. ("Inactive voters" can reinstate their status to "active" by updating their voter registration or by voting in any election.)
- **Absentee** – The method of voting where a voter is mailed their ballot which they then return by mail or return to their County Election Board in person. In addition, voters confined to a nursing home or veteran's center who are visited by County Election Board representatives are also considered to be absentee voters.
- **Absentee Ballot Delivery Method** – The method used to deliver the requested absentee ballot to the voter. Absentee ballots may be delivered by mail, in-person, or by electronic delivery. By law, electronic delivery is only available to military, overseas, and blind voters.

OK Elections Interactive Statistics (EIS) Guide

- **Affiliation** – The political party that the voter indicated they wish to be affiliated with. Voters not affiliated with a particular party (or who left it blank on their application) are listed as Independent.
- **Agent (Absentee)** – Oklahoma law allows an agent to act on behalf of a voter in very limited situations, for instance, when a voter is applying for an Emergency Incapacitated Absentee Ballot. Agents may be anyone of the voter's choosing who is at least sixteen (16) years of age; provided, the person is not employed by nor related within the third degree of consanguinity or affinity to any person whose name appears on the ballot.
- **Application Source (Absentee)** – The method by which the voter initially applied for absentee ballots (mail, online, etc.).
- **Ballot Type** – The reason used during a voter's absentee ballot application for why they requested an absentee ballot (or ballots). Oklahoma is a "no-excuse" state, so a ballot may be requested for any reason, but certain reasons offer additional services/protections for the voter.
- **Care of Incapacitated** – An absentee ballot request type for voters who are responsible for the care of another person who is physically incapacitated.
- **Cancellation or Deletion Type** – Voter registration may only be cancelled for reasons allowed by law. Reasons for cancellation include written notification from the voter, death, transfer to another county or state, surrendering an Oklahoma Driver License in another state, conviction of a felony, judicial determination of mental incapacitation, failure to respond to a confirmation of address mailing or being excused from jury duty for not being a citizen of the United States.
- **Address Confirmation Notice** – In odd years, Oklahoma law requires the mailing of Address Confirmation Notices to voters who meet the specified criteria. Voters who receive an Address Confirmation Notice and do not respond will be changed to Inactive status. Voters who return an Address Confirmation Notice with certain allowed changes have the source of those changes listed as "Confirmation Notice Response".
- **County** – One of the seventy-seven (77) individual jurisdictions that make up the State of Oklahoma. Each county has a County Election Board that is responsible for conducting elections.
- **Early Voting (In-Person Absentee Voting)** – Oklahoma law allows for a few days of voting at a predetermined location ahead of each Election Day. Typically, this is done at the voter's County Election Board, but other sites may be designated as well.
- **Election Day Transfer** – In Oklahoma, a voter may submit a voter registration application at their polling place to transfer their registration to a new address. Applications submitted in this manner are assigned a source code that indicates that the registrations were received as an "Election Day transfer".
- **Emergency Incapacitated** – An absentee ballot request type for voters who suffer an emergency that prevents them from coming to the polling place after the deadline to request an absentee ballot has passed, which is the third Monday (15 days) prior to the election.
- **Emergency Responder** – An absentee ballot request type for voters who are first responders that will be unavailable to vote in person on Election Day due to deployment as a first responder or emergency worker to assist with the rescue, recovery, or relief efforts of a declared natural disaster or state of emergency.
- **In Person** – The method of voting where the voter casts their ballot at their designated polling place.

OK Elections Interactive Statistics (EIS) Guide

- **Inactive Voters** – Inactive voters are registered voters who were sent an Address Confirmation Notice and failed to respond to the notice. "Inactive" voters who do not update their voter registration, vote or have any other voter activity through the following two consecutive general elections for Federal office will have their voter registration cancelled, as required by law.
- **Pre-NVRA** – This "source" of voter registrations is actually a designation of voter registrations that existed prior to the National Voter Registration Act of 1993 which first required tracking by source.
- **Precinct** – A subdivision of counties that is used to create distinct, geographical areas used for election purposes. Most precincts typically have their own polling location (although sometimes multiple precincts share a location).
- **Source (Voter Registration)** – The method, agency or other designation that describes where a voter's registration originated from. Many are self-descriptive. Those that are not are in this list of terms.
- **Statistics Date** – The date used to designate a grouping of statistics. It can mean the number as of the date, such as the total number of voter registrations as of the end of a month. Alternatively, it can represent an entire month's transactions, such as the total number of cancellations during a month.
- **Status** – The voter's registration status which is either Active or Inactive (see above).
- **UOCAVA** – The Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA) was enacted by Congress in 1986. UOCAVA requires that the states and territories allow certain groups of citizens to register and vote absentee in elections for Federal offices. In addition, most states and territories have their own laws allowing citizens covered by UOCAVA to register and vote absentee in state and local elections as well. United States citizens covered by UOCAVA include:
    - members of the United States Uniformed Services and merchant marine;
    - their family members; and
    - United States citizens residing outside the United States.
- **Voter History (or Voter History Credit)** – The history of a voter's participation in an election. Typically referenced as the election date for which they cast a ballot.
- **Voting Method** – The manner in which a voter cast their ballot for an election. Valid methods are: in person (at their polling place), in-person absentee voting or "early voting" (at their County Election Board or other designated location) or absentee (typically by mail, but also includes nursing home and veteran's center confined voters).
